ELSEVIER Applied Mathematics and Computation 110 (2000) 265

APPLIED MATHEMATICS AND COMPUTATION

www.elsevier.nl/locate/amc

Author index to volume 110 (2000)

Adomaitis, R.A. and Y.-h. Lin, A collocation/quadrature-based Sturm–Liouville problem solver 110 (2000) 205
Agouzal, A. and F. Oudin, A posteriori error estimator for finite volume methods 110 (2000) 239

Batzel, J.J. and H.T. Tran, Modeling instability in the control system for human respiration: applications to infant non-REM sleep 110 (2000) 1
Bin Mohd, I., Identification of region of attraction for global optimization problem using interval symmetric operator 110 (2000) 121

Jain, M.K., *see* Lakshmikantham, V. 110 (2000) 53

Lakshmikantham, V., S.K. Sen, M.K. Jain and A. Ramful, $O(n^3)$ noniterative heuristic algorithm for linear programs with error-free implementation 110 (2000) 53
Lin, Y.-h., *see* Adomaitis, R.A. 110 (2000) 205

Mehrazin, H., Optimum shapes of reservoirs 110 (2000) 83
Mehrazin, H., Resolution of partial differential equations by rotation 110 (2000) 225
Muses, C., Validating Kepler's conjecture: A new approach 110 (2000) 99

Oudin, F., *see* Agouzal, A. 110 (2000) 239

Ramful, A., *see* Lakshmikantham, V. 110 (2000) 53
Ramos, J.I., Heat and mass transfer in annular liquid jets: I. Formulation 110 (2000) 133
Ramos, J.I., Heat and mass transfer in annular liquid jets: II. *g*-jitter 110 (2000) 165
Ramos, J.I., Heat and mass transfer in annular liquid jets: III. Combustion within the volume enclosed by the jet 110 (2000) 185

Sen, S.K., *see* Lakshmikantham, V. 110 (2000) 53

Tagliani, A., Existence and stability of a discrete probability distribution by maximum entropy approach 110 (2000) 105
Tran, H.T., *see* Batzel, J.J. 110 (2000) 1
Travis, B., *N*th Order extension of the Wintner–Leighton theorem 110 (2000) 115

Wazwaz, A.-M., The decomposition method applied to systems of partial differential equations and to the reaction–diffusion Brusselator model 110 (2000) 251
